Deniz Erkan

Mechanical Engineer/Junior Developer

After a short period of study in the field I graduated from, I decided to focus on programming. I focused on Python and C# programming languages and I am still developing projects in these languages. My goal is to work in areas where I can actively use my mechanical engineering knowledge. However, I worked efficiently in other areas as well such as web developing and i enjoyed all of them. Moreover, I am still developing myself in the fields of data engineering and machine learning . I'm working on obtaining certificates on those areas. Although i had interruptions in my business life and not actually working in any company in recent years, i am a hardworking, determined person who is prone to group work and cares about communication. Thank you for your interest in my resume, have a nice day.

Experience

○ 2019 - 2022

Freelancer

Web developing(back-end), web design, web-based programming

I must note that i'm not quite professional in front-end design, but i can deal with necessary adjustments. But i'm not confident on creating an entire template design.

○ 2017 - 2018

Becreative Software & Constultancy Muğla/TURKEY

Junior Engineer

Web design , web-based programming

○ 2015 - 2016

Beşeli Mühendislik LTD. ŞTİ. Ankara/TURKEY

Mechanical Engineer

Infrastructure , plumbing , heating and ventilation designs of various facilities , such as hospitals , government facilities and military bases.

○ 2013 - 2014

Atabar Engineering & Constultancy Adana/TURKEY

Mechanical Engineer

Infrastructure , plumbing , heating and LPG/NG designs of various facilities , such as hospitals , industrial areas and military bases which are located in Iraq.

○ 2012 - 2013

Desteknik Mühendislik ve Teknik Ekipman LTD.ŞTİ

Adana/TURKEY

Mechanical Engineer

Selection and supply the technical equipment for industrial facilities.
